Honed

Tumbled

Sandblasted

Description: Turkish limestone is a sedimentary rock that's a popular choice for building materials, flooring, and wall cladding. It is made up of calcite and aragonite minerals, and often contains fossilized debris and shell fragments. Turkish limestone is known for its unique qualities, including:

- Light reflectivity: Turkish limestone has the highest light reflectivity in the world.
- Cottony texture: Turkish limestone has a soft, cottony texture that can give spaces a fresh, unique look.
- Durability: Limestone can last a long time with minimal care
